- Proficient in AutoCAD Software
- Nicet lvl I – Fire Alarm Systems
- Computer Languages – C++, Java, HTML, CSS, Java Script, basic SQL.

---

## *Work Experience*

### **Coded Systems Designer – 2018 - Current**

*Firetrol - Fort Worth, TX*

- Provided design or drawing assistance for projects during the development and as-built stages of the engineered drawings. Worked on projects with varying levels of complexity including the most complex design projects. Obtains electronic plans from engineers/architects/owners. Obtains design drawings from sprinkler, electrical and mechanical contractors. Creates engineered drawings (AutoCAD, etc.). Prepares record drawings and O&M manuals according to project requirements.
- Review scope, defined product specification, application and electrical requirements for code compliance and AHJ Requirements.
- Participate in internal design review meetings as coordinated by the Project Managers. Participate in project turnover meetings with both sales and project team. Provides project team with all documentation, programming graphics, etc.

### **Coded Systems Designer – 2015 - 2018**

*Communication Concepts- Fort Worth, TX*

- Provided design or drawing assistance for projects during the development and as-built stages of the engineered drawings. Worked on projects with varying levels of complexity including the most complex design projects. Obtains electronic plans from engineers/architects/owners. Obtains design drawings from sprinkler, electrical and mechanical contractors. Creates engineered drawings (AutoCAD, etc.). Prepares record drawings and O&M manuals according to project requirements.

- Participate in internal design review meetings as coordinated by the Project Managers. Participate in project turnover meetings with both sales and project team. Provides project team with all documentation, programming graphics, etc.

### **CAD Engineer - 2012- 2015**

*Design Systems Group - Grand Prairie, TX*

- Responsible for setting up job drawings to company standard so the fire alarm system could be designed. Prepping job files to be sent to the city for approval, editing drawing files to match field marked drawings, and prepping close out documents to be sent to the costumer.
- Responsible for computer related issues in the office and maintaining the office server. (~15 computers)
- I also helped install the fire alarm systems and do system testing on an as needed basis.
